

SUNWILL

Optimal Wear Solutions For Impact Crusher

*We can't stop wear,
but can slower it.*

- **Ceramic embedded blow bar**

Compared with the conventional blow bar, Ceramic blow bar provides 2 to 3 times wear life as long as the former.

- **Bimetallic chocky bar for rotor**

Compared with hardfacing on rotor, chocky bar provides 3 to 4 times of wear life, and also it is more easier to be welded on.

- **Chrome brazed side liner**

Compared with Hardox liner, Chrome brazed liner provides 3 to 4 times of wear life, and it is faster to be assembled with the bolts pre-welded.
